Water-Filled Barrier

36" water-filled barrier

Specifications

| | |
|------------------|---|
| Width: | 24 in |
| Length: | 72 in |
| Height: | 36 in |
| Condition | Weight |
| Empty | 70 lbs (31.75 kg) |
| Filled (approx.) | ~900 lbs depending on water fill volume (industry standard based on 36" water barriers) |

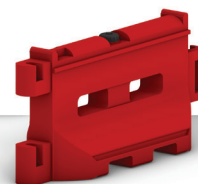

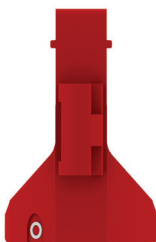

Applications

- Road & highway construction zones
- Parking lots & event protection
- Pedestrian walkways
- Perimeter fencing & jobsite security
- Crowd control

A durable, impact-resistant water-filled barrier designed for traffic control, pedestrian safety, and work zone separation. Lightweight when empty and extremely stable when filled, it offers fast deployment, easy transport, and secure interlocking for extended runs.

Key Features

- Accepts Windscreens & Fence Panels: Compatible with rolled fence or chain-link panels for improved privacy, security, and visibility.
- Lightweight & Easy to Move: Can be positioned by one or two workers; forklift entry holes simplify transport.
- Easy Fill & Drain: Large threaded fill cap and bottom drain plug for quick setup and removal.
